

Medicare-Home Visits in the Clear

December 11, 2018

Starting January 01, 2019, providers won't be required to document a specific reason for making a home visit, according to the final rule. That means that practices can report home-visit codes **99341-99350** without extra documentation supporting medical necessity, which was previously required for a "home visit made in lieu of an office or outpatient visit" CMS says.
